Policy of the Company

Carbosystem produces and commercializes parts and materials for different industrial areas, mainly in sectors where thermal and electrical isolation for high temperature is required.

The policy of the company has been and still is to consolidate a group of people with motivation, dynamism, and to be very integrated in the concept of customers support service.

Therefore our major target is the satisfaction of our customers

Structure of the Company

Carbosystem group is formed by many factories, specialized in producing and manufacturing different materials and parts. The main branch is located in Valdemoro-Madrid.

Mechanizing Factory (Milan):

Using the most modern technology of production by means like CNC technology, cutting machines, robots, milling and lapping machines, etc.

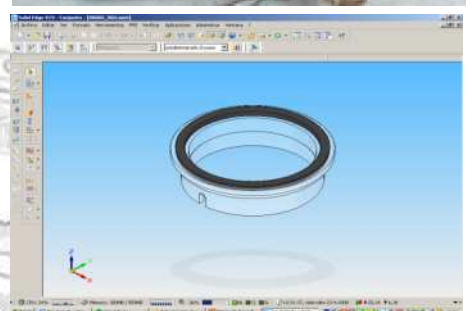

Production Factory (Foshan China):

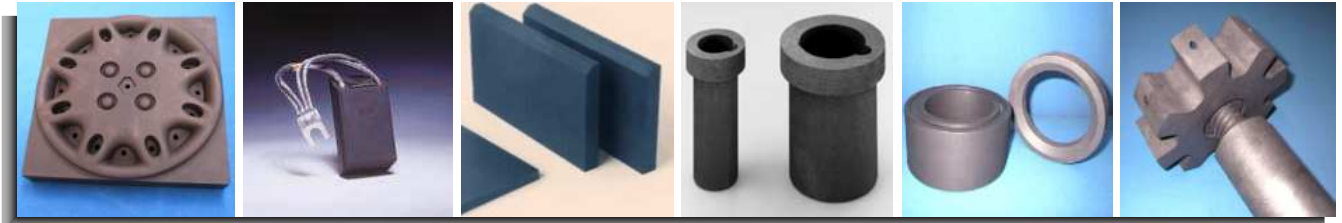

Sintering and vacuum furnaces, pressing and extrusion machines, mixture and milling equipments, inspection lab, etc.

Headquarters and warehouse (Madrid) :

Engineering, design, research and development. Sales, logistic, general warehouse, technical service and customer satisfaction.

presentation

Commercial area – Sales:

We have the most advanced tools and software to manage with our customers.

- Messenger, skype, webcam,
- Data Base
- Management program Visual Factu, etc.

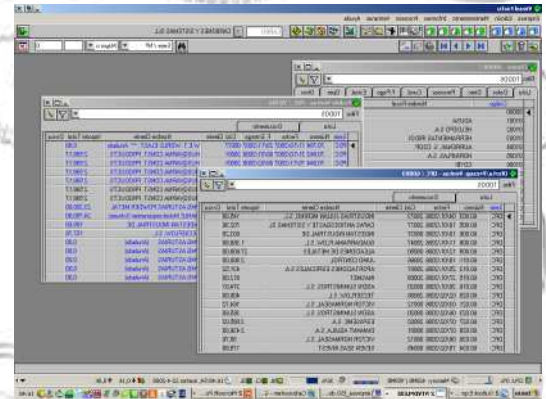

Marketing:

We configure and develop (among other possibilities) :

- Design of our own web pages (Front Page, Java Script, Html)
- design and layout of our catalogues.

Logistics:

Maximum coordination and control, with the main market couriers, DHL, TNT, FEDEX, TOURLINE, etc.

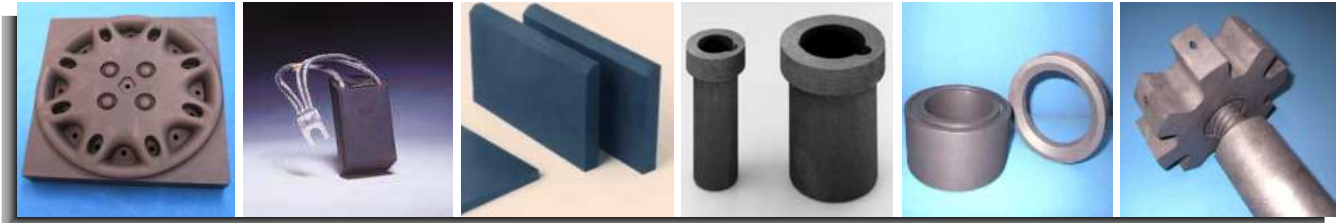

Products and Services

Carbosystem produces, commercializes, represents and delivers parts and materials for the industry, mainly related with high temperature applications. Between the most significant, we can remark:

- Graphite with its different degrees
- Graphite + impregnations
- Silicon Carbide and Tungsten
- Ceramics - Aluminas
- Molybdenum and its alloys
- Composites and Carbon Fiber CFC.

presentation

Areas and Applications

The graphite and ceramic materials represent one of the widest fields at industrial level. Products named below, are just an example of the most representatives.

- Refractory
- Mechanical Seals
- Parts for Furnaces
- Casting
- Glass Industry
- Strips and Brushes
- Vanes for Pumps

Parts for Furnace

Casting

Electric

Mechanical Seals

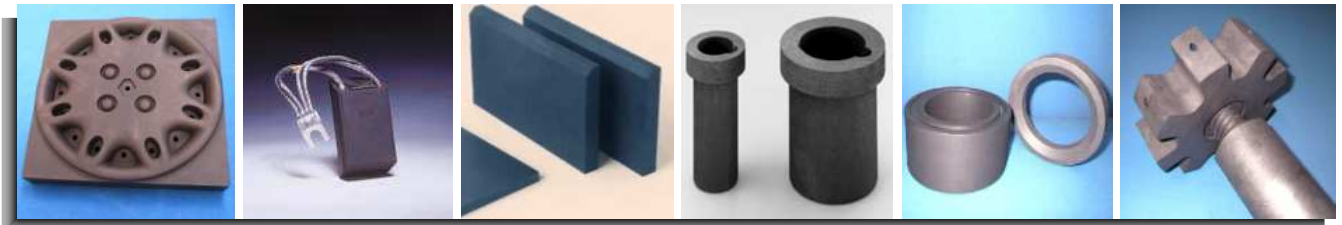

Vane for Pumps

Quality commitment

We consider the quality as the result of a correct management, customer service and internal controls. Therefore, we are involved in the continuous accomplishment and improvement of a Quality: System based on the ISO 9001:2000 Regulation.

Our quality policy requires:

- To accomplish with the requirements of the standard reference.
- To adapt our activity to the actual and future needs of our customers.
- To establish a continuous improvement system on the Quality System already founded
- To consider the prevention of the problems as a main goal.

The quality specific targets are a part from the CARBOSYSTEM general purposes, they are defined every year and are detailed on plans or concrete programs in order to reach their attainment, with its responsible definition, execution terms and the needed means to reach them.

Customer service

As we said before, our main target is to satisfy our customer. The general lines are based on the following points:

- Immediate answer to their requirements.
- Look for technical solutions to their needs.
- Advice about the most suitable material for each application.
- Detailed information of qualities and techs specs.
- Enquiry attainment with best quality-price relation.
- Immediate attention and resolution for possible claims.
